United States Patent Office.

ISIDORE DREYFUS, OF NEW YORK, N. Y.

Design No. 3,434, dated March 30, 1869.

DESIGN FOR AN OIL-CUP FOR JOURNAL-BOXES.

The Schedule referred to in these Letters Patent and making part of the same.

To all whom it may concern :

Be it known that I, ISIDORE DREYFUS, of the city, county, and State of New York, have originated a novel Design for the Shells of Oil-Cups; and I do hereby declare that the following is a full, clear, and exact description of the same, reference being had to the accompanying drawings, which form part of this specification, and in which—

Figure 1 represents a view of an oil-cup, provided with a shell formed according to my design, and

Figure 2, a horizontal section of the same.

Similar letters of reference indicate corresponding parts in both figures.

This invention relates to that description of oil-cups in which a glass cylinder is contained within a metal shell; and

It consists in a novel design for such shell.

Referring to the accompanying drawings—

A is a shell of cylindrical form, and having vertical openings, *a*, formed in its walls, lengthwise thereof, and parallel with each other.

Said openings *a* are of elongated form, having rounded upper and lower extremities, as represented in the drawings.

Said cylindrical shell A has a base, B, of polygonal form, and is supported upon a neck, C, as shown.

What I claim as my invention, and desire to secure by Letters Patent, is—

The design and configuration of the shell of an oil-cup, substantially as herein described, and represented in the accompanying drawings.

ISIDORE DREYFUS.
